## Projects

### Aid Tracking / Research

A one year project with the Center for Social Development Studies, Chulalongkorn University to monitor and evaluate the usage of tsunami related funds in Thailand and whether they are being used and distributed fairly and wisely. This research will produce comprehensive information on tsunami aid management in Thailand. It is hoped that this project will be able to address issues related to the politics, implications, and policy issues of relief and community empowerment, leaving enough scope for learning and advocacy.
